4: Richter M, G-5 (ca. 1856-1870) 1870 AW5 Coorg AW5

132 ment. A peculiar ulcer-disease on the limbs has lately been
[164] rather prevalent about Virajpet, which is ascribed to impoverished blood, for want of nourishing animal diet.

The account which natives of Mysore or from the Western
[727] Coast give of the climate of Coorg is not favorable. They
[648] have experience on their side. Of the large number of people, whom Tippu sent from Mysore to replace the ancient inhabitants, or who during the various wars were carried off by the Coorg Rajahs from the neighbouring countries to cultivate
[167] their lands, but few survived the change. In our days the thousands of Mysore coolies who annually emigrate to work on the Government roads or on coffee estates stand the climate much better, care being bestowed upon them and a periodical return to their homes being rendered practicable.

241 198 **4. Cultivation of the principal productions.**

Native agriculture in Coorg, as elsewhere in India, is still carried on as it was centuries ago. A system of rural economy, formed at a remote period and transmitted for ages unchanged, is not likely to be disturbed by so conservative a people, as are the Coorgs.

243 *Rice* is the staple product of Coorg. The numerous valleys throughout the land have, from ancient times, yielded an unfailing supply every year for home consumption and for exportation to the Malabar Coast. The rice-valleys are most extensive in South-Coorg, in the neighbourhood of Virajpet and in Kiggatnád, where some fields are of considerable breadth and several miles in length; but owing to the surrounding low, deforested hills which yield little fertilizing detrition, the soil is of a quality inferior to those fields of the narrower valleys near the Ghats, where the ground is terraced at considerable pains, but every field large enough for the use of the plough. The lower and broader fields of a
